PROGRAM INTRODUCTION • DEVELOPMENT DRAFT

## To the Honorable Judge:

We respectfully request consideration of Aurora’s proposed educational and community participation program as a potential option for individuals whose circumstances make conventional service difficult.

The proposed model combines independent educational study with separately identified, approved community-benefit activities. Flexible delivery may assist individuals in residential treatment or with other barriers to in-person participation.

## Proposed accountability and documentation

• Participant account and identity checks appropriate to the program.
• Structured reading, video instruction, quizzes and lesson examinations.
• Activity records, review of submitted work and separate approval of eligible service hours.
• Completion documentation and limited certificate verification, once the necessary systems are operational.

Any permission to count particular activities toward a judicial obligation remains exclusively with the court.

The platform is presently in development. This letter is not a certificate, confirmation of enrolment, assurance of court acceptance or representation that verified service hours are currently available.

Respectfully,
Office of the Executive Director
The Aurora Initiative
